## GREETINGS

Dear Dahlia Friends:

It is with great satisfaction that we present our tenth annual price list. The past year has been a trying one due to the war and a very wet season. However, last fall we harvested a fair crop of roots, and think we will have enough to go around. Our list is much shorter this year due to the fact that we were sold out of so many varieties at planting time last spring.

This occasion affords an opportunity to thank you, our customers, for the nice orders sent us last year and other years, be they great or small. We can assure you they have been greatly appreciated.

So friends another year has rolled by, and if you are interested in some new dahlias, just sent in your order, and we will endeavor to give the same prompt and courteous service as always.

The first five on the list are 1946 introductions, one of which is our own.

Our gardens have been Federal and State inspected and have been found to be free of dangerously injurious insects and plant diseases.

We guarantee all stock to be true to name to the extent of replacement next year. Not responsible for more than the purchase price, as we do not have control over growing conditions. Kindly notify us at once if anything is unsatisfactory when received, or if plants or roots fail to grow after being planted a reasonable length of time.

Last year was the worst year in history for leaf hoppers here and we lost a number of valuable plants by not being able to get spraying done at the proper time. So spray for them. We prefer a good pyrethrum spray and we may try the new D. D. T.
